Working with Partners on Data Collection Efforts

- Demonstrating impact of programs is critical; data collection must be as effective and efficient as possible
- Ongoing communication with partners on data collection development
 - Program area provider meetings, typically quarterly
 - Ad hoc and subcommittee workgroups
 - Ongoing communication, technical assistance, program monitoring between analyst and partners
 - Coordination of outcome measures within and across program service areas

What do
monitoring
visits tell us?
How does this
process fit in
with one time
only funding?

- Review of program measures and performance, identification of service delivery barriers, unmet demand for services
- Visits may inform larger policy needs
- Spring / Early Summer visits and fiscal year limitations

Questions?
